

Internal Case Study

"The aim of creating a simple, easy-to-use application has now been achieved. The new capacity to add certificates and proof of other qualifications will further reinforce the application."

Technical Direction, Bureau Veritas in Spain

BVQualif Tool for Industry & Facilities Division

"Integrated tool to monitor qualification requirements for international services"

BUSINESS CHALLENGE

- When carrying out major international projects, Bureau Veritas often has to meet contractual requirements that stipulate a common framework regarding the qualifications of inspectors
- We have to comply with the requirements of local authorities in order to retain our operating licenses

SOLUTION

- The application has been available on the Intranet to managers worldwide since 2007
- The qualification database enables qualification procedures from various countries to be 'translated' into standard paths, and also means that specific skills can be searched for and certificates printed
- Requestors and approvers ensure that qualifications are attributed correctly and kept up to date

BENEFITS

- Our qualification management processes are rigorous and reliable
- The processes are also paper-free, increasing productivity
- Business support has been enhanced, and mapping of technical expertise is now much easier

ENTITY PROFILE

- Industry & Facilities Division
- Annual sales: €480 m
- Main services provided: Conformity assessment of facilities & items of equipment throughout their lifespan
- Number of countries using the Integrated tool: 26 at the end of 2008
